My color mixing grid

Use your own pencils, markers or paints: color the swatch squares, then fill each square of the grid with the mix of the two colors in its row and column.

4 rules to remember

1. Blue + yellow = green, red + yellow = orange, red + blue = purple.
2. Neighbors on the circle: bright mix. Face to face: brown or gray.
3. Start with the shy color (yellow, white) and add the strong one in tiny amounts.
4. Two colors, three at most: beyond that, your mix turns to mud.
